Project Evaluation

Provectus Group, Ltd, a consulting and contaminated land contracting company was looking for a cost-effective retaining wall solution that could be easily installed and later landscaped. The GEOWEB® retaining wall system met all the criteria for this site.

GEOWEB® RETAINING WALL ADVANTAGES

- Allows the use of onsite materials for infill and backfill.
- Quick installation; project was completed within 4 weeks.
- Structurally strong yet lightweight system conforms well to differential settlement.
- Allows reclamation of land areas with less-than-desirable soil properties.
- Topsoil in the outer wall facia provides a natural environment for sustainable vegetative growth.
